

TITLE: SPOTLIGHT APPARATUS WITH SOLAR POWER

BACKGROUND OF THE INVENTION

In some gardens, it is usually provided with plants or statues for
5 decoration. At night, it is necessary to use a spotlight to lighten the
decoration to show its figure and to obtain its decorative purpose. Since
the spotlight must be provided independently and connected with extra
electrical wires, it will be very trouble and inconvenient. At the
meantime, the electrical wires exposed outside will break the view of the
10 garden.

Accordingly, the present invention is to provide a spotlight
apparatus with solar power, which can be combined with any decoration
as a single object that can overcome the drawback of a prior art. Now
with following drawings, it will disclose the characters and effects of the
15 present invention.

BRIEF DESCRIPTION OF THE DRAWINGS

Figure 1 is a perspective view showing a spotlight apparatus with
solar power combined with an embodiment of decoration according to the
20 present invention.

Figure 2 is a cross-sectional plan view of Figure 1.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

Please referring to Figure 1 and 2, it discloses an embodiment of
25 the present invention in applying on a potted plant. The apparatus
includes a container (1) being separated into two portions, one of which is

provided with a plane consisted by many solar plates (11) and a battery (12) therein. A spotlight (13) is mounted on the plane and connected with the battery (12) by electrical wires. Another portion of the container (1) is provided with earth (2) therein and plants (21) are planted
5 on earth (2).

In daytime, the solar plates (11) can store the solar energy in the battery (12). And at night, the battery (12) can provide the power for spotlight to lighten the plants (21) to obtain the shining decorative effect. Since the apparatus is a single body, it can be placed at any desired
10 position in the garden. It will be useful and effective. Moreover, the extra connecting electrical wires are no more necessary. This is also an obvious improvement and solves the problem of a prior art.

Accordingly, the present invention obtains the predicted purpose. But the above embodiment is only an example disclosed in the
15 description. Any other decoration is possible to provide by this invention. For example, a statue can replace the plants to put on the container. And it can be lightened by the spotlight to show its special decorative effect at light.
